Summary

I like to use technology (new & old) to help people solve problems. I am comfortable behind a keyboard, and I know what standards are and why they are important. I can create applications using a number of platforms and languages, and I can teach people how to use them. I can lead others, and I can follow leaders. My wide skill set will make me an asset to organizations of all sizes. I bring a positive attitude and a jump-in-and-get-it-done mentality to anything I try. I am always learning, and I am always looking for new adventures.

Skills & Accomplishments

JavaScript, JSON, PHP, HTML, CSS, Linux, Blender3d Video Production, Streaming Media, Event Sound, Project Management	Runner-up at 2012 API HackdayPDX 2 nd in Class, Alcan 5000 Winter Rally 1 st Prize, Juneau Theory Slam, 2008	Created & Produced “Meltdown”, a 40-Hour gaming festival.
